

WELLNESS POLICY LANGUAGE

BELIEF STATEMENT

The Board of Education of Dolton School District 149 is committed to providing a learning environment that supports and promotes wellness, good nutrition, and an active lifestyle and recognizes the positive relationship between good nutrition, physical activity and the capacity of students to develop and learn. The entire school environment shall be aligned with healthy school goals to positively influence students' beliefs and habits and promote health and wellness, good nutrition and regular physical activity. In addition, school staff shall be encouraged to model healthy eating and physical activity as a valuable part of daily life.

INTENT

The purpose of this policy is to ensure a total school environment that promotes and supports student health and wellness, helps to reduce childhood obesity and meets the requirements of the Child Nutrition and WIC Reauthorization Act of 2004 and the Illinois School Code, including, without limitation, goals for nutrition education, physical activity and other school-based activities designed to promote student wellness; nutrition guidelines for all foods available during the school day; a plan for measuring implementation including designating one or more persons charged with operational responsibility; and involving parents, students, school food service providers, the school board, school administrators, and the public in developing this policy.

RATIONALE

A disturbing number of children are inactive and do not eat well. The result is an alarming 16 percent of children and adolescents are overweight – a three-fold increase since 1980. Congress passed the Child Nutrition and WIC Reauthorization Act of 2004 on June 30, 2004. Recognizing the role schools can play in health promotion; this law requires local education agencies participating in a program authorized by the National School Lunch Act or the Child Nutrition Act of 1966 to develop a local wellness policy. The objectives of the wellness policy are to improve the school nutrition environment, promote student health and reduce childhood obesity. In addition, Public Act 094-0199 amends the Illinois School Code, requiring the Illinois State Board of Education to establish a state goal that all districts have a wellness policy.

The link between nutrition and learning is well documented. Healthy eating patterns are essential for students to achieve their full academic potential, full physical and mental growth and lifelong health and well-being. Healthy eating is demonstrably linked to reduced risk for mortality and development of many chronic diseases. Schools and school communities have a responsibility to help students acquire the knowledge and skills necessary to establish and maintain lifelong healthy eating patterns. Well-planned and well-implemented wellness programs have been shown to positively influence children's health.

Schools also have a responsibility to help students establish and maintain lifelong habits of being physically active. According to the U.S. Surgeon General, regular physical activity is one of the most important things people can do to maintain and improve their physical health, mental health, and overall well-being. Regular physical activity reduces the risk of premature death in general and of heart disease, high blood pressure, colon cancer, and diabetes.

Consistent School Activities and Environment –Physical Activity

- Physical education shall be provided by trained staff that is certified by the state to teach physical education. All physical education teachers shall regularly participate in continuing education activities that impart the knowledge and skills needed to effectively promote enjoyable lifelong healthy eating and physical activity among students.
- Physical education classes shall have a student to teacher ratio comparable to those in other curricular areas.
- The physical education program shall be closely coordinated with the other components of the overall school health program. Physical education topics shall be integrated within other curricular areas. In particular, the benefits of being physically active shall be linked with instruction about human growth, development, and physiology in science classes and with instruction about personal health behaviors in health education class.
- Schools are encouraged to limit extended periods of inactivity. When activities such as mandatory testing make it necessary for students to be inactive for long periods of time, it is recommended that schools give students periodic breaks during which they are encouraged to stand and be moderately active.
- Schools are encouraged to develop community partnerships with other child-serving organizations such as park districts and YMCA's to provide students with opportunities to be active.
- Schools are encouraged to provide student and community access to and promote use of the school's physical activity facilities outside of the normal school day.
- Physical activity facilities and equipment on school grounds shall be safe.

Food or Physical Activity as a Reward or Punishment

- School personnel shall be encouraged to use nonfood incentives or rewards with students (Attachment D) and shall not withhold food from students as punishment.
- School personnel shall not use physical activity as a punishment or withhold participation in recess or physical education class as a punishment.

NUTRITION GUIDELINES FOR ALL FOODS AND BEVERAGES AVAILABLE ON SCHOOL CAMPUSES DURING THE SCHOOL DAY

- Food providers shall offer a variety of age-appropriate, appealing foods and beverage choices and employ food preparation, purchasing and meal planning practices consistent with the current Dietary Guidelines for Americans (e.g. provide a variety of fruits and vegetable choices; serve low-fat and fat-free dairy products; ensure that whole grain products are served).
- All foods and beverages sold individually (apart from the reimbursable school meal) on school campuses during the school day shall meet nutrition standards (Attachment A). This includes:
 - a la carte offerings in the food service program;
 - food and beverage choices in vending machines, snack bars, school stores; and
 - foods and beverages sold as part of school-sponsored fundraising activities.
- Nutritious and appealing foods and beverages, such as fruits, vegetables, low-fat dairy foods and whole grain products, shall be available wherever and whenever food is sold or otherwise offered at school.
